Flux Removers

Flux removers (defluxers) remove flux residues left by manufacture, rework, or repair of printed circuit boards. Residues from higher, lead-free temperatures are more baked on and harder to clean. G3® and Ecoline™ flux removers have been proven very effective at removing fluxes baked on at lead-free temperatures.

- RoHS Compliant
- Rapid Evaporation
- No Oily Residue
- Non-Corrosive

G3 and Ecoline defluxers easily clean tough baked-on rosin flux contaminants in 3-5 seconds.
