

Glass furniture

We had a nice order yesterday from a customer who is a glass specialist, and in this case is making metal TV stands with glass shelves. He will be using [DYMAX 605](#) adhesive, which is an excellent, clear glass/metal bonder which cures with UV light in a few seconds. He also bought an adhesive dispenser and a UV curing flood lamp from us, as we offer the whole package. Initially, he visited us here at our *Technology Centre* to bond up the prototypes for his customer approval.
