

It's clear: Opti-tec 5013 is great for glass bonding!

We sell a lot of [UV adhesives for glass bonding](#) – this application is perfect for UV curing, and we have a lot of [capability](#).

Sometimes, our customers need another solution. For example, they might not have a [UV curing lamp](#), and the production volumes do not justify a purchase at this stage.

In these cases, we invariably recommend [Opti-tec 5013](#), which is a two part clear epoxy which bonds very well to glass (and metal). It has the viscosity of honey, which means it is fairly easy to use, and a fast cure time, which minimises fixturing and holding. It is supplied in a convenient side-by-side double syringe cartridge.

Opti-tec 5013 is used for bonding and repairing glass

It's clear: Opti-tec 5013 is great for glass bonding!
