In September 2009, **DPA** (*Design Products & Applications* magazine) will celebrate the start of its thirtieth year of publishing with a special Anniversary Issue. Over this period of thirty years they have seen extraordinary leaps in technology that have quite simply changed the way we live – the personal computer, mobile telephony and the Internet, to mention just a few. Manufacturing industry, too, has enjoyed the benefits of remarkable technological advances, and to celebrate this, they have been asking suppliers and manufacturers to nominate products that they believe are representative of these advances for an online ‘virtual’ awards event, which they have dubbed, the [DPA 30th Anniversary issue Innovation Awards](#).

We are really pleased to have our [DYMAX See-Cure adhesive technology](#) as an entrant in the **Materials & Fasteners** section.
