

A dummy on the small size - 01005 caps and resistors

The 01005 (or metric 0402) measures just 0.1" x 0.05", half the width and half the length of the previous smallest component, the 0201. The placement of 01005s presents challenges in nearly every aspect of the assembly process.

Can you pick up, center and place accurately and reliably? With [Practical Dummy 01005 resistors and caps](#) you can refine your process while saving money.

Do you need other sizes? We have them. 0201, 0402, 0503, 0805, 1206, and 1210s. Surface mount electrolytic caps in 3, 4, 5, 6.3, 8 and 10mm. Tantalum Caps, Melf resistors, we've got it all. Have a look at our comprehensive [catalogue of Dummy Electronic Components and Mechanical Samples](#)
