

Digital printer heads cleaned best with our swabs

When I look through the customer names for our [TEC 2306 TechSwabs](#), the words *Sign* or *Signs* keep coming up, as well as *Exhibition, Display, Art, Graphics, Design* and *Print*. That's because these foam cleaning swabs have been proven by all these companies to be excellent for *cleaning the print heads of digital printers*. The swabs are reticulated polyurethane foam, ensuring excellent absorbency whilst minimising contamination. The tips are heat sealed to prevent tip loss even whilst saturated with solvent.

They are also bulk-packaged in bags of 1000, for best value.
