

# IPA Isopropyl Alcohol wipes - for better adhesive bonding

We have recently added some new [pre-saturated IPA wipes](#) to our very successful **ADH 1610** product range. **ADH 1611** wipes are pre-saturated with 70%/30% IPA/DI water, and come in a re-sealable pouch.

These wipes are used for all sorts of industrial cleaning, including surface preparation prior to adhesive bonding. But they are not limited to that. Our customers use them for cleaning of all types of plastics, signage, pre-print, digital printers and so on – isopropyl alcohol is safe to use on most plastics.

The [webpage](#) now has some *illustrative videos* too!
