

## Will UV give you faster, cleaner, more effective bonding?

We sent out a simple overview of the range of [DYMAX UV curing equipment](#) by mail to 1,000's of customers last week. Whether you are interested in UV spot cure lamps, a conveyorised system that integrates with your production line or the latest **LED curing technology**, we have a lamp.

UV curing can substantially increase the speed of automated assembly, facilitate 100% in-line inspection and improve your throughput. We spend a lot of time discussing the technology with customers, who come to us for both material and equipment solutions. They come for discussions and demonstrations at our [Technology Centre](#), or we consult with them at their factories, R&D centres or laboratories.

# Will UV give you faster, cleaner, more effective bonding?
