

# Accurate dispensing up to 60ml per minute with preeflow

The [preeflow®](#) family gets a new big brother, through the development of the new [eco-PEN 700 3D](#) from *ViscoTec*. The brand new geometry between rotor and stator generates a three times bigger output without any velocity loss in dispensing. The **eco-PEN 700 3D** reaches a volume flow of up to 60 ml/min – this means the **eco-PEN** range covers the entire array of micro dispensing starting from 1 µl, whilst still retaining the well known features like repeatability > 99 % and the reproducible accuracy  $\pm 1\%$ . **preeflow®** stands for easy, exact and accurate dispensing.
