

Versatile robotic dispensing.... benchtop or gantry system

With low cost robotics playing a significant part in cost-reduced/quality-upgraded small scale production, the new [Fisnar Unitop F5200N](#) will interest production engineers in all industries, especially as it has the ability to be used as a gantry, as well as a benchtop robot.

The [F5200N](#) is a compact dispensing robot with all moving axes above the work piece. It is ideal for form-in-place gaskets, adhesives, potting, coating and filling. The Unitop™ design makes it suitable for any platform requiring a gantry type mounting providing open access under the robot, conveyor fed automation or installation in work cells operating as a slave robot.

Versatile robotic dispensing.... benchtop or gantry system
