# Araldite Adhesives App - help for adhesive choice

Araldite have launched an **Adhesives App** to assist you in making a choice from their range of industrial structural adhesives. The range contains a selection of adhesives from the latest epoxy, polyurethane, methacrylate and silane-terminated polymers technologies. They are available in a variety of packaging, including easy-to-use cartridges with static mixers and working packs for manual applications, as well as drums for higher volume applications.

From adhesives with long open times for large area applications to fast-curing adhesives for early removal from fixtures and rapid through-put, the range includes adhesives which are resistant to high temperature, water and chemicals. Liquid adhesives as well as thixotropic adhesives for gap filling or vertical applications are available – and you can purchase them from us. We would also be delighted to help you in your adhesive choice, so give us a call.
