

Precision metering, mixing and dispensing of two part adhesive and resin systems

The [preeflow® eco-DU0450](#) is a two-component precision volumetric, positive displacement, dosing/mixing/dispensing system that gives you accuracy and repeatability.

The [preeflow eco-DU0450](#) uses the precision dispensing technology of the [preeflow eco-PEN](#) – by integrating two eco-PENS through a manifold and a static mixing nozzle, and provides extremely precise metering, mixing and dispensing of critical two-part materials like epoxies and silicones. The [preeflow® eco-DU0450](#) can dispense as small as 0.01 millilitres.

Applications will encompass micro-electronics, medical optics, LCD/LED/OLED, bio-science and a wide range of other industries where it is important to ensure exact quantities of materials are metered, mixed and dispensed.
