

Autoclavable adhesive/encapsulant for optical and medical applications with USP Class VI

Polytec EP 630 is a two-part epoxy adhesive which provides excellent high temperature, chemical, electrical and moisture resistance. Especially designed for applications in the semiconductor, medical, hybrid, piezo, fibre optics, HV and UHV applications, it has an excellent adhesion to silicon, glass, metal, ceramic, ferrite and most plastics and can be used as a low viscosity adhesive, epoxy impregnation, underfill or an encapsulant.

Polytec EP 630 has survived more than **1,000 autoclave steam cycles** and is **USP Class VI** certified. This product is also available pre-mixed, frozen and bubble-free and in viscosity variations.
