

# See us at this medical device design and manufacturing show

[Med-Tech Innovation Expo](#) takes place 10-11 April 2013 at the Ricoh Arena, Coventry. Med-Tech Innovation Expo is 100% dedicated to [medical device design and manufacturing](#) and is at the very heart of the industry – and we are on stand 6!

We will be focusing on [adhesives and adhesive systems for medical device manufacture](#) – how to address issues such as biocompatibility, process validation, structural integrity and production simplicity in the bonding of plastics, metals, ceramics and other substrates commonly used in this arena. Our Product Specialists will be pleased to advise how to achieve optimum bonding, potting, sealing, coating and encapsulation performance using repeatable, validate-able robust processes with the most effective combination of high quality materials, application/dispensing and curing equipment.

On display will be examples from our range of **ISO 10993 and USP Class VI adhesives** which include DYMAX UV curing products plus Opti-tec and Polytec PT epoxies. These are matched with the most suitable application and curing equipment, including Thinky mixing and degassing equipment and dispensing solutions from Fisnar and preeflow. The Liquidyn range of high precision jetting dispensing equipment offers high accuracy and repeatability appropriate to medical assembly processes.

Our successful philosophy is to develop trust-based relationships in order to achieve the best in service, support, advice and supply chain management, whatever the application. We invite you to come and visit us at the show.
