

Conformal coating masking tape, silicone free

We are re-launching our [self-adhesive tapes for masking during the conformal coating process](#).

INT 630 Conformal Coating Masking Tape is a polyester film based tape with a *silicone-free* synthetic resin adhesive, and a conductive adhesive layer designed to reduce static discharge upon application and removal. Most users prefer silicone-free adhesives for this masking procedure, as silicones can cause local de-wetting and adhesion problems for the coating.

This tape is readily available in rolls and die-cut discs of various widths and diameters.
