

# FAST Times at Silverstone

We were delighted to have the opportunity to speak at last week's [FAST Exhibition](#) and show off the latest in adhesive, protective materials and the associated curing and dispensing equipment at our stand. In a packed seminar, our managing director, Peter Swanson, explained the necessary considerations when selecting [dispensing equipment for adhesives and coatings](#) and focused specifically on precision dispensing based on positive displacement and jetting technologies. If you didn't have the opportunity to attend Peter's presentation, [do let us know](#) and we will supply you with some of the information that he covered.

At our stand, we had the pleasure of speaking with dozens of people about their specific production needs – everything from dispensing ceramic paste to bonding access flaps for boilers – and enjoyed meeting many new people. Alongside our team were guests from Viscotec, producers of [preeflow](#) products, to help us demonstrate their [eco-PEN precision volumetric dosing pumps](#).

Thank you to everyone who attended Peter's seminar and those who took the time to have a chat with us on our stand. We look forward to seeing many of you again at the **FAST Exhibition in September!**
