

Fast curing clear adhesive for plastics and metals

Description

[L&L A-K015](#) provides clear bondlines in plastics assemblies, with a very fast fixture time of 3-4 minutes and robust, primerless adhesion. It is especially valuable for bonding plastics such as acrylic, polycarbonate, ABS or PPMA. An example application is point of sale displays or signs, where it gives an unobtrusive transparent bond, even when squeeze-out or witness of the joint is unavoidable.

[A-K015](#) is a specialist two-component toughened methyl methacrylate adhesive which is suitable for bonding plastics or other materials, including most metals, thermoplastics and composite substrates. Developed originally for automotive assembly, [A-K015](#) brings to a wide range of industrial manufacturing situations the benefits of high strength, impact durable bonds which are resistant to weathering such as salt spray and QUV radiation. It is non-flammable and low odour for improved occupational health and safety consideration.
