

# Advantages of Using Light-Curable Masking for Surface Protection

**Dymax SpeedMask® temporary masking resins** offer reliable surface protection of components, often more than traditional masking materials such as tapes, lacquers, and waxes. Learn about the advantages of our light-curable maskants in this informative infographic and see a real life example of how switching from thermal tape to a SpeedMask® maskant saved one company 40,000 hours of labour a year.

# Advantages of Using Light-Curable Masking for Surface Protection

## ADVANTAGES OF USING LIGHT-CURABLE MASKANTS FOR SURFACE PROTECTION

### Easy, Instant Application

- No heating or mask preparation needed
- Numerous application methods available (i.e. spray, jet, bead dispense, coat)
- Less chance of application errors that result in edge-lift and leakage

### Conforms to Complex Shapes

- Reliable coverage on hard to mask parts
- Eliminates labor intensive application

### Solvent-Free, 100% Solids Masks

- Provides a greener process
- RoHS compliant
