

Video: Adhesives, protective materials and processing equipment for medical device assembly

We offer [materials and processing equipment to meet the bonding and assembly needs of medical device manufacturers](#). A range of **ISO 10993** and **USP Class VI** materials are compatible with the substrates commonly used in the industry. The range comprises structural adhesives, coatings, sealants, form-in-place gaskets and temporary masks – all for medical device assembly. And mixing, dispensing and curing equipment that supports efficient, reliable and repeatable processing to help achieve process validation.
