

Video: accurate, positive displacement dispensing and dosing

The [preeflow eco-PEN](#) dispenses and doses with accuracy and repeatability whilst optimising material usage. It can dose or dispense any liquid, from free-flowing solvents to heavily filled conductive adhesives, in volumes as small as 0.001ml. Its positive displacement pump technology enables precision volumetric fluid control without stress to the material. The eco-PEN is suited to semi and fully automatic dispensing/dosing operations.
