

Thinky Mixers - new catalogues released

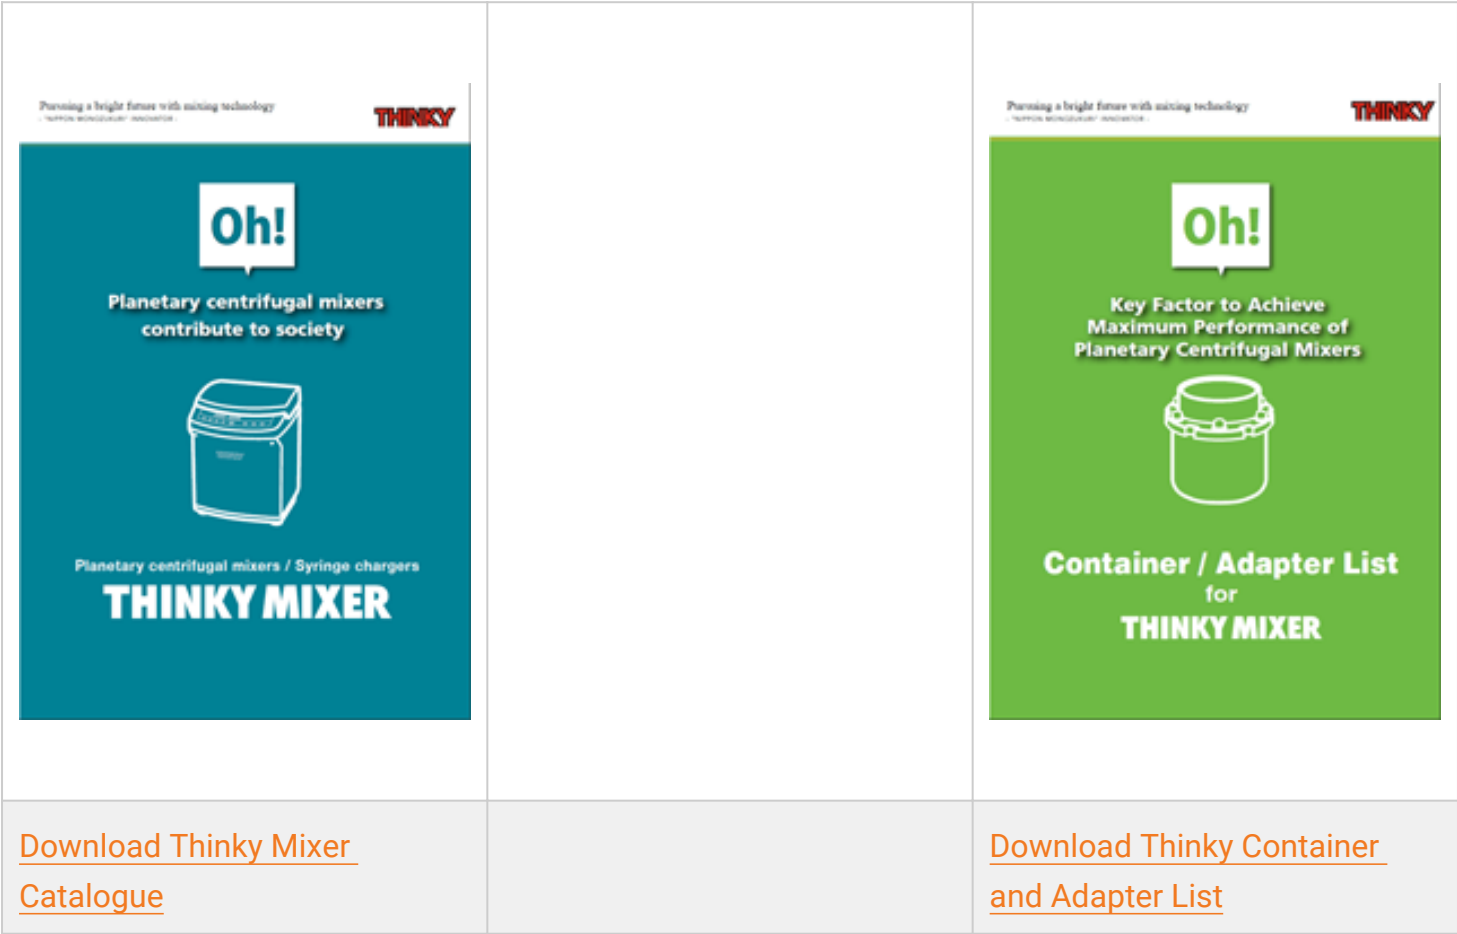

Thinky, our partner for [mixing and degassing machines](#), has released a new set of catalogues detailing their products and technology.

The [Thinky Mixer Catalogue](#) presents the principles of planetary mixing alongside practical advice about what materials can benefit from the technology. Comprehensive technical specifications are provided for each mixer in the Thinky range, from small benchtop mixers to floor-standing models capable of mixing and degassing large quantities.

In conjunction with the Mixer Catalogue, Thinky has also produced a [Container and Adapter List](#) which outlines all of the accessories available for Thinky mixers to optimise the machines for different materials, packaging, and quantities.

All CE-marked [Thinky Mixers](#) are available from us – we have demonstration facilities here at our [Technology Centre](#), and the most popular machines are available from stock for next day delivery.
