

Dispensing Seminar @ FAST Exhibition September 2016

Description

On the 22nd September 2016 we will be [exhibiting](#) and presenting at the [FAST Exhibition](#) at the [The Williams Conference Centre, Grove, Oxfordshire](#).

Managing Director Peter Swanson will be presenting a **seminar** entitled [Adhesive & Coating Dispensing – Meeting the Challenges of Technology Manufacturing](#). Adhesives, protective materials, lubricants, etc, can only do their job if applied in the correct quantity and location. Couple that need with the demands of production speed, the ever finer tolerances and repeatability required for quality, and the increasing miniaturisation of technology-based products, and the challenge gets tricky. Materials may have multiple parts, filler content, difficult rheology or limited working life. Deposit volumes can be fractions of a millilitre. The process needs to be robust, consistent and able to be validated.

Come along and hear our thoughts at the seminar. Specialist help will be available all day at our stand too, so bring along any queries or curiosities you may have about adhesives and dispensing.

Don't forget you'll need to [register before the big day](#), entry is free but only with pre-registration. We look forward to seeing you at the FAST Exhibition!
