

How to degas a syringe using a THINKY ARE-250 mixing and degassing machine

How to degas a syringe using a THINKY mixing and

degassing machine is a visual guide to removing air from syringe packaged materials. Suitable for degassing materials from low to high viscosity the **THINKY ARE-250** can also **uniformly mix your compound, epoxy, adhesive, silicone, paste, powder or other material** before being decanted into syringes and degassed ready for dispensing.

How to degas a syringe using a THINKY ARE-250 mixing and degassing machine

Check out our [YouTube channel](#) for more about this technology and [contact the team](#) to **arrange a live demonstration** at your location or at our home in Oxfordshire.
