

Brief reflections on an exciting year

At our company meeting yesterday, we reflected on the many interesting, exciting and challenging projects we have been a part of this year. Our customers continue to impress us with incredible innovation, and we love being a part of so many world-changing ideas. From saving lives, to improving car and home safety, to saving the planet, making the world more secure, helping innovation, advancement of cancer research, exploration of earth and space, and improving many aspects of the way we live, we feel very privileged to support these projects from initial design, through manufacturing implementation, to full production. Thank you to our customers for involving us in all of the amazing things you do!

Something we're particularly excited about is our growing ability to support customers with bespoke equipment and full integration services. Our technical team has done an outstanding job for our customers this year, and that's why we're pleased to present them with the **Intertronics Award for Excellence**. Congratulations to (L-R) Gavin, Kevin, and Chris – and thank you for all of your hard work.

Brief reflections on an exciting year

As UK manufacturing continues to innovate and boost productivity, we look forward to the many fascinating applications our customers will bring us in 2018.
