

Choosing a Structural Adhesive: Free Seminar

Peter Swanson, our Managing Director, will be delivering a seminar titled

The Art and Science of Choosing a Structural Adhesive at **FAST Live**, held at the National Motorcycle Museum on May 10. The seminar, and the co-located exhibition, are free to attend.

With an increasing number of **structural adhesives** on the market, this technical seminar will explain how to choose the best ones for your application.

The use of adhesives to provide a structural bond can take the place of mechanical fasteners and provide advantages to your business. These include performance and reliability improvements, and reduction in manufacturing costs; however, there is no universal adhesive which works for everything.

Starting with design and working through production and processing considerations, Peter will discuss the various factors which will influence your decision, and how to develop a specification based on necessary priorities and allowable compromises.

Attendees will have the opportunity to discuss their particular applications in greater detail with our technical specialists at the exhibition, for personalised advice.

To register for the seminar, and to attend FAST Live, please visit

<http://www.fastenerexhibition.co.uk/register>

If you are unable to attend, get in touch with us to discuss the possibility of hosting this **structural adhesives seminar** at your own location for you and your colleagues.
