

Video: WACKER SilGel 612 potting compound offers transparency and shock absorption

WACKER SilGel 612 silicone gel potting compound has a cured consistency that is really hard to describe in words, so we have demonstrated it in video format.

This soft silicone gel provides excellent shock and vibration absorption in addition to the usual benefits of potting compounds such as component protection from water and other environmental contaminants. SilGel 612 has a simple 1:1 mix ratio, it offers great adhesion and is crystal clear for excellent visibility. It is flame retardant (UL listed 94HB).

Have a look:

You can find more information on any of our [Wacker Silicone encapsulants and potting compounds here](#).
