

We have moved!

To deliver better customer service and accommodate further growth, we have opened a new state-of-the-art facility in Kidlington, just across the street from our previous location. Inaugurated on February 25 2019, the building provides increased warehouse space to enable next day delivery, an enhanced office area to house our growing team and a new [Technology Centre](#) to give customers greater access to our equipment and expertise.

The additional space will allow us to store a greater number of adhesives, coatings, sealants, and mixing, dispensing, and curing equipment. The improved warehouse capabilities will help Intertronics further develop our customer service by enabling next day delivery for a wider range of products.

We have moved!

Our new headquarters at 12a Station Field Industrial Estate, Kidlington

“We are always striving to deliver the best customer service,” explained Peter Swanson, Managing Director. “Our new facility helps to make this possible as we continue to grow. Choosing the right adhesive and dispensing equipment for an application is a challenging task and we are passionate about helping our customers make the right choice.”

“By opening a state-of-the-art facility with over two and a half times the space, Intertronics can continue to offer an excellent selection of materials, coatings and sealants for manufacturers and

We have moved!

product designers. The move will also future proof our business, ensuring we have space for an expanding team as well as a warehouse to hold our critical stock and growing product range.”

In the new Technology Centre, our product specialists will offer customers hands-on trials and demonstrations of our extensive range of adhesives, dispensing equipment, robots, curing equipment and more. The new site is also home to a workshop space dedicated to custom-builds. In the workshop, Intertronics builds bespoke products, such as fully integrated dispensing systems, to meet the specific requirements of our customers’ applications.

If you would like to book a visit to our new facility or if you want to speak to our product specialists about your application, [please get in touch](#).
