

Integrating dispensing, curing and surface preparation equipment

We have a wide experience of integrating **dispensing, curing** and **surface preparation** equipment with our robots. Combining one or more of these processes onto one platform can deliver production efficiency and productivity – often at realistic cost which can payback very quickly. This two minute video explains the benefits we have delivered to customers over numerous projects.

Have a look at some examples of applications we have facilitated with our [robot process integration capability](#).
