

Upgraded fluid dispensing controller offers increased repeatability

Description

Our popular [Fisnar DC100 digital dispensing controller](#) has been upgraded to feature a high precision pressure regulator. As a result, the levels of dispense accuracy and repeatability the controller offers are now even higher.

As a versatile dispenser for adhesives, sealants, coatings, inks, greases, and other fluids, the **DC100** digital dispenser is designed to suit a wide variety of dispensing applications, from microdot deposits and lines, to large potting and filling. Integral and intelligent dispense software allows the user more control over dispensing applications.

The upgraded regulator is widely regarded as one of the most high-performance regulators on the market with regards to its pressure relief characteristics and constant pressure control. With a regulator sensitivity of 0.2% and a repeatability of +/- 0.5%, the **DC100 dispensing controller** can achieve exceptional levels of dispense accuracy and repeatability.
