

Game changing two-part cyanoacrylate adhesives available in convenient cartridges

Born2Bond two-part cyanoacrylate adhesives bring game-changing advancements to the world of adhesives, overcoming many of the performance and application limitations of existing cyanoacrylate adhesives.

- [Born2Bond Structural](#) is the toughest structural, fast cure two-part (2K) cyanoacrylate adhesive on the market, with the longest open time.
- [Born2Bond Flex](#) is the only two-part cyanoacrylate adhesive on the market with >200% elongation.
- [Born2Bond Repair](#) is faster and tougher than standard cyanoacrylate adhesives, with half the level of shrinkage.

Born2Bond's two-part cyanoacrylate adhesives are supplied in 50g, side-by-side cartridges for convenient processing. Both resin and hardener are dispensed through disposable, static mixing nozzles, forming a homogeneous material at the pull of a trigger.

Their convenient size allows for easy integration into [dispensing guns](#) for manual applications, or into [pneumatic cartridge dispensers](#) for those looking for an automated process with even greater control. Check out our short video below to see just how easy they are to process:

If you have ruled out cyanoacrylate adhesives for your assembly in the past, this may be the time to re-evaluate. [Get in touch](#) for your evaluation sample.
