

# Stories from our customers - a case history collection

*“The ability to mask complex shapes in one application and cure*

*quickly on demand has reduced work in progress, improved quality and increased throughput.”*

*“We have managed to increase production four-fold and enjoyed faster manufacturing time, reduced labour costs, and a consistently high-quality result with no defects or wasted material.”*

*“It has allowed us to quickly produce homogenous silicone in large quantities that is free of air, transforming a time consuming, physical task into an automated effortless one.”*

*“The final result dispenses to an accuracy of 100µm, offers the client a significant labour saving and increases throughput.”*

# Stories from our customers - a case history collection

*“We estimate our return on investment to be in the region of £2,000 a month.”*

*“The robot is quicker than manual operations. This is a measurable factor in being price competitive with offshore manufacturing. We observed lower unit costs and improved quality straight away.”*

These are some quotes and testimonials from our customers. We are always excited to hear that a customer is prepared to share their successes with us, and the wider world. We have collected some of the case histories and application stories into a document called [Stories From Our Customers](#). You will be inspired by their examples, and it could fire up some ideas of your own.

You can always find the latest success stories from our customers in the [Case Studies](#) section of our website.
