

Getting charged up about our electric cars, and yours!

We're always finding new ways to minimise our environmental impact as a company, from biodegradable packaging, to paperless transactions, to eliminating single-use cups from our water coolers. Our company fleet has been steadily modernising to electric vehicles. To support this, and to encourage employees who may be considering the purchase of their own electric car, we have just upgraded our two EV charging ports to a bank of six.

Now our employees don't have to play rock/paper/scissors to decide who goes home on a full charge, and if you're coming to visit our [Technology Centre](#) or meet with our team, there's room for your electric car, too. We'd be delighted to help you get charged up before you get back on the road!
