

Electronics Industry Awards - we are finalists

A bit of excitement around here as we have been listed as

finalists in the *Medical Product of the Year* category at the [2022 Electronics Industry Awards](#).

We have been recognised for releasing [Dymax' 2000-MW series](#) of medical device materials – a range of medical wearable adhesives and encapsulants which help adapt wearables devices to industry trends and customer requirements. These materials are the first biocompatible, light-curable adhesive product line to be specifically formulated without common skin irritants and materials of concern for medical wearable and electronics applications.

We'll find out more after the awards ceremony on October 27, 2022. Watch this space.
