Description

Also available to buy online at [intertronics](#)
SHOP

Blunt end stainless steel dispensing tips or dispensing needles are the most popular type of dispensing needle. They can be supplied in different gauges (I.D.) and lengths – standard length is 1/2", but also stocked are 1/4", 1" and 1 1/2" – depending on requirements. Our range also offers options where the needle is epoxy bonded or crimped to the polypropylene hub.

Straight Tips

Standard straight blunt end tips are available in a variety of lengths: 1/4", 1/2", 1", 1 1/2". Construction – stainless steel straight cannula epoxy sealed to a double helix Luer lock polypropylene hub. Polished burr-free finish for smooth fluid dispensing.

Angled Tips

Angled tips can be used for application on difficult to reach areas. We can supply blunt end dispensing tip with either 45° and 90° bends. Available in 1/2" standard length. Construction – stainless steel cannula epoxy sealed to a double helix Luer lock polypropylene hub. Polished burr-free finish for smooth fluid dispensing.

Crimped Tips

For use with aggressive materials – such as strong solvents – which may break down the bond between hub and needle in regular blunt end tips. Available in 1/2" and 1" length. Construction – stainless steel straight cannula crimp sealed to a polypropylene hub with “ear-type” Luer lock fastening. Polished burr-free finish for smooth fluid dispensing.

All of our dispensing tips are compatible with the [standard Luer fitting](#), so are suitable for use with our [dispensing barrels](#) and [manual syringes](#), as well as most other dispensing barrels and syringes on the market.
