

Fisnar F5000 Series Benchtop Gantry Dispensing Robots

Description

The automation of any manual benchtop dispensing application can be easy to justify, with a quick return on investment (ROI). The versatile **UNITOP™ F5000 Series** robots are compact and economically priced robots that can be used either as a benchtop or a gantry system. The F5000 series dispensing robots are ideal for conveyor fed automation or installed in work cells operating as a slave robot.

The **F5000 Series** have work areas up to 300mm with a resolution accuracy of 0.001mm. Using the teach pendant, these benchtop gantry dispensing robots support Fisnar's industry-leading dispensing software and can store and retrieve up to 100 programs containing 50,000 points each. They have a three-axis design and are capable of interfacing with any INTERTRONICS dispensing equipment.

The modular connectivity design of the Fisnar F5000 series offers an easy configuration with a number of add-on productivity accessories such as [Tip Alignment Kit](#), [Height Sensor](#) and [CCD Camera Vision System](#). Our in-house technical team are available to help you select the most efficient and cost-effective dispensing system for your application.

We are able to provide complete robotic dispensing systems to include any required [dispensing valves and pumps](#), [material feed reservoirs](#) and [robot safety enclosures](#). Dispensing equipment can be easily integrated with curing or surface preparation equipment to improve your process.
