

# Flexible Dispensing Tips

## Description

Also available to buy online at  **SHOP** 

**Flexible dispensing tips** are polypropylene needles bonded to colour coded hubs. They provide an ability to dispense in hard to reach areas. They may be cut to length or at an angle to provide a range of dispensing options or to remove material which has cured within them. They are corrosion resistant, and can dispense highly corrosive or aggressive materials.

All of our dispensing needles are compatible with the **standard luer fitting**, so are suitable for use with our **dispensing barrels** and **manual syringes**, as well as most other dispensing barrels and syringes on the market.

## Features & Benefits

# Flexible Dispensing Tips

Flexible and bendy

- Available in 1.5" (standard) and 0.5" lengths
- Colour-coded
- Corrosion resistant
- Evaluation samples available
