

# PTFE Lined Dispensing Tips

## Description

Also available to buy online at [tbe-tips.com](#)  
SHOP

**PTFE lined dispensing tips** are recommended for dispensing cyanoacrylate adhesives or other low viscosity materials. These stainless steel tips have a Teflon (PTFE) insert lining that projects slightly out from the stainless steel needle. When used as cyanoacrylate dispensing needles, the PTFE lining helps prevent clogging as cyanoacrylate adhesives will typically not react with it. The low surface energy of the PTFE surface improves flow characteristics.

The needle/PTFE tubing is bonded to a colour coded hub with an industry standard luer lock fitting.

All of our dispensing tips are compatible with the [standard luer fitting](#), so are suitable for use with our [dispensing barrels](#) and [manual syringes](#), as well as most other dispensing barrels and syringes on the market.

## Features & Benefits

- Recommended for dispensing cyanoacrylate adhesives
- Prevents clogging
- Burr-free polished stainless steel needle
- Threaded luer lock fitting

# PTFE Lined Dispensing Tips

- Evaluation samples available
- Normally stocked for next day delivery
