

Robot Enclosures for Benchtop and Gantry Robots

Description

Robot enclosures provide protection to the robot from accidental damage, and also protect the operator from moving parts while the robot is in operation. Our team of technicians build robot enclosures suitable for all of the robots that we sell, and will produce bespoke enclosures to meet your specific requirements. Often, the robot enclosure is a component of a [turn-key automated dispensing system](#) we assemble for a customer.

Features & Benefits

- Protects robot from accidental damage and debris
- Protects operator from moving parts
- Bespoke sizes and configurations available

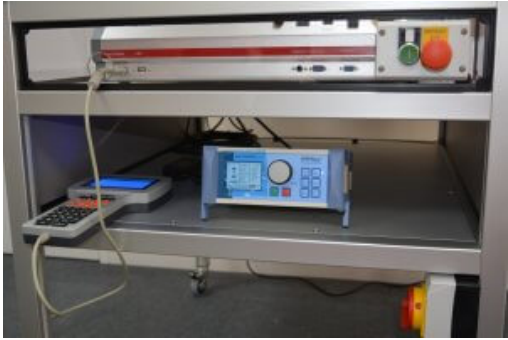

Standard Features

Robot Enclosures for Benchtop and Gantry Robots

- Aluminium frame with cable channels
- Perspex top and side panels

Robot Enclosures for Benchtop and Gantry Robots

Robot Enclosures for Benchtop and Gantry Robots

- base plates on benchtop models
- lighting
- light curtains, which stop operation if penetration of the enclosure is detected
- glazed doors on the front which lock during operation
- shelving for controllers or ancillary machinery
- legs and wheels for free-standing enclosures
- Remote operation box

The robot enclosure can be delivered on its own or as part of a [full dispensing system](#).

Ordering Information

As all of our robot enclosures are built to order, please [contact a member of our Technical Team](#) to discuss your requirements.
