

TechSwab Cleaning Swabs

Description

Also available to buy online at [mouser.com](https://www.mouser.com/techspray)  **SHOP** 

Techspray TechSwabs™ are precisely designed cleaning swabs, manufactured and packaged to serve various cleaning and maintenance needs. TechSwabs are manufactured in accordance with rigid specifications, using specialised materials to ensure low particle generation and solvent compatibility.

Swab tips are manufactured with a variety of quality materials to suit different tasks. Most are heat sealed onto handles to avoid contaminating residues of adhesives. Handles are fashioned from a selection of natural and man-made materials chosen for their flexibility and durability.

Foam Swabs

All foam swabs are 100 pores/inch reticulated polyurethane foam, ensuring excellent absorbency whilst minimising contamination. Affixing tip by heat seal prevents tip loss even whilst saturated with solvent. Flexible tips provide versatility, whilst rigid heads allow for more aggressive cleaning. All our Foam Swabs have an anti-static handle which is also pliable.

Cotton Swabs

All cotton swabs are tightly wrapped, pre-cleaned cotton ensuring the least amount of extractable contaminants. Wooden handles (TEC 2300, TEC 2301) offer aggressive cleaning.

Features & Benefits

- Lint free

Part number	Tip width	Attachment of tip	Handle length	Handle material	
TEC 2303	4.8mm	Heat sealed	131mm	Polypropylene	
TEC 2306	13mm	Heat sealed	102mm	Polypropylene
